# MediFleet BCP

# Introduction

This BCP outlines procedures and strategies to ensure recovery and protective measures will be taken in the event of a disruption. These disruptions involve power outages, cyber-attacks, and natural disasters.

# Business Impact Analysis (BIA)

Critical Functions: Online Ordering, Shipping and receiving, Employee and Customer Database

Potential Disruptions: Supply Chain Delays, Production Halts, CyberAttack, Natural Disaster.

Impact: Loss of Revenue, customer frustration, downtime.

# Risk Assessment & Mitigation

Supply Chain Disruptions: Establish alternative suppliers and back up specific stock.

Power Outages: Backup generators & Solar

CyberSecurity: Strong IT security measures, backup data, and employee training to minimize certain attacks like phishing.

Natural Disasters: Evacuation plan for stock and company supplies.

Regulatory Compliance: Active Monitoring of regulations and adjusting policies.

# Response and Recovery Strategies

Incident Response Team: Designate key personnel responsible for enacting the BCP.

Communication: Maintain communication with employees, customers, and suppliers if anything occurs.

Data Recovery: Implement backups and IT systems to ensure minimal downtime.

Financial Contingencies: Establish emergency funds.

## Testing and Maintenance

Conduct regular drills.

Update the plan annually to keep it optimized.

Train employees for emergency protocols

## Conclusion

This BCP ensures that the MediFleet business has a proper plan and can handle procedures in case anything occurs. MediFleet will be able to continue operations under disruptions. MediFleet will continuously update and improve the plan to make sure it stays relevant and well-informed.
