Now you're ready.™

Background

Department Name	MediFleet LLC
Department Owner (Director/Manager)	
Products and Services Directly or Indirectly Delivered by This Department	☐ P&S #1 Electric Motorcycles ☐ P&S #2 Battery Packs ☐ P&S #3 Charging Stations ☐ P&S #4 Accessories ☐ P&S #5 Maintenance Services

Department Overview

The following table captures key department characteristics that may influence the assignment of recovery objectives and the selection of recovery strategies.

Department Narrative Description	MediFleet LLC is a company that specializes in the production and distribution of electric motorcycles. The department is responsible for designing, assembling, and shipping motorcycles to customers.
Customers and Outputs (Internal or External)	• External
Peak Operating Periods or Seasonality	• Spring

Impact Analysis and Recovery Requirements

The following table describes each department's activity and the possible impact should it fail to operate.

Activity	Description	Impact of Downtime (Over Time)		Proposed RTO (hours/days)
Production Line	Assembles the bikes	Financial:	Loss of revenue from halted production.	
		Regulatory, Legal and/or Contractual:	Potential contract breaches with dealers	
		Reputational:	Damage to brand with delays	
		Operational:	supply chain and distribution delays	
		Health/Safety:	Risk of manual labor	
Computers	Used for processing orders, communication, and analyzing production volume.	Financial:	Orders cannot be processed	
		Regulatory, Legal and/or Contractual:	Risk of downtime	
		Reputational:	Products being shipped late or not processing correctly.	
		Operational:	Disrupts supply chain	
		Health/Safety:		
		Financial:		
		Regulatory, Legal and/or Contractual:		
		Reputational:		
		Operational:		
		Health/Safety:

Critical Records

The following table summarizes the various informational needs necessary to operate, both electronic and hard-copy.

Record / Data Name	Description	Location	Backed Up?	Offsite (if yes, list location)
Order Data	Customer and dealer orders	Cloud Server	X Yes ☐ No ☐ Partial	Yes Data center
Inventory Records	Parts and materials	ERP system	Yes	Yes Secondary Server
Employee Records	Files and Payroll	Internal Database	Partial	No

Key Threats, Vulnerabilities and Risk Treatment Options

The section of the BIA data gathering worksheet is used to “link” the department’s inputs to current-state business continuity risk mitigation efforts (controls), summarize alternate procedures and manual workarounds, estimate impact and likelihood of failure, and identify other possible risk treatments.

Loss of Key Roles/Personnel

The following table summarizes key roles and/or personnel in order to understand their importance and potential impact on department.

Role	Description (Responsibilities and Activity)	Existing Controls	Impact of Loss Described	Probable Impact of Loss	Estimated Likelihood of Loss	Risk Treatment Options
Machine Operators	Assembly of cycles	Trained employees	Major	☐ Catastrophic ☐ Major X Moderate ☐ Minor	☐ Certain ☐ Probable X Possible ☐ Unlikely	Train additional staff
IT Support	Maintains order system	Remote IT	Moderate		possible	cloud-based support

Loss of Key Facility or Equipment

The following table summarizes the facilities used and equipment needed for the operation of this department.

Facility / Equipment	Description of Use	Existing Controls, Recovery Strategies Alternate Procedures	Impact of Loss Described	Probable Impact of Loss	Estimated Likelihood of Loss	Risk Treatment Options (Alternate Sites, Contingent Sourcing, etc.)
Computers	Order processing	Cloud Backups	mobile device access	☐ Catastrophic X Major ☐ Moderate ☐ Minor	☐ Certain ☐ Probable X Possible ☐ Unlikely	Mobile workstations
Assembly Line	Motorcycle production	Redundant machinery	Temporary outsourcing	catastrophic	possible	Backup facility

© Castellan Solutions

Loss of Key Technology

The following table summarizes the key technology (i.e. systems and applications) necessary for the operation of this department.

Technology Name	Technology Source (IT, 3rd Party, etc.)	Description of Use	Existing Controls or Manual Work Arounds	Impact of Loss Described	Probable Impact of Loss	Estimated Likelihood of Loss	Requested RTO (hours)	Requested Data Loss Tolerance (hours)	Risk Treatment Options
ERP System	IT Dept	Inventory and supply chain tracking	cloud backup		☐ Catastrophic X Major ☐ Moderate ☐ Minor	☐ Certain X Probable ☐ Possible ☐ Unlikely	8	8	Secondary backup system
Order processing software	3rd party	Manages orders	Manual Entry		Catastrophic	Possible	4	4	Offline order-taking process

Loss of Key Supplies/Vendors

The following table summarizes the key supplies or services provided to the department that are necessary to maintain operations.

Supply or Service	Source(s)	Description of Use	Existing Controls (Safety Stock, Alternate Supplier, etc.)	Impact of Loss Described	Probable Impact of Loss	Estimated Likelihood of Loss	Risk Treatment Options
Battery Cells	Supplier A	power source for the cycles	Alternate supplier		☐ Catastrophic X Major ☐ Moderate ☐ Minor	☐ Certain X Probable ☐ Possible ☐ Unlikely	Stockpiling(Short term)

© Castellan Solutions

Shipping Services	Logistics	Paying for shipping from delivery companies	Multiple shippers		Major	Probable	Contacting delivery companies that can pickup from your warehouses.

Recovery Requirements

The following tables summarize various resource requirements and when they are needed following the onset of a disruptive event.

Staffing Resource Requirements

The following table summarizes the quantities, work-from-home capabilities and recovery requirements for those key roles identified above.

Role	Normal Level	Current Location	Work From Home*	< Day 1	Day 1	Day 2	Day 3	Day 4	Day 5	Week 2	Week 3	Week 4	Total (needed by role for recovery)
Machine Ops	50	Warehouse	No	25	35	50	50	50	50	50	50	50	
IT Support	5	Remote/Warehouse	Yes	3	4	5	5	5	5	5	5	5	

Equipment/Supply Requirements

The following table summarized the quantities, offsite availability and recovery requirements for the key equipment and supplies identified above.

Resource	Normal Level	Currently Available Off-Site?	< Day 1	Day 1	Day 2	Day 3	Day 4	Day 5	Week 2	Week 3	Week 4	Total

© Castellan Solutions

Computers	10	X Yes ☐ No	5	8	10	10	10	10	10	10	10	
Batteries	500	No	250	350	500	500	500	500	500	500	500

Ratings Definitions

Estimated Likelihood

Rating Name	Description
Certain: More than one failure per year	Failure is almost inevitable more than once annually.
Probable: Failure once every 1 or 2 years	This process or similar processes have often failed at least once over a two year period.
Possible: Failure once every 3 to 5 years	This process or similar processes have experienced occasional failures, but not in major proportions (no more than every three to five years).
Unlikely: Failure once every 6 years or more	Isolated failures associated with similar processes, often occurring once every six or more years.

Probable Impact

Rating Name	Description
Catastrophic	Failure affects safety or involves noncompliance with customer or regulatory requirements. May endanger personnel. Most likely will result in serious disruption to customer operations and / or other operational, financial or reputation issues.
Major	High degree of customer dissatisfaction due to the nature of the failure. Failure does not involve safety or government regulation. May result in serious disruption to customer-facing operations and / or other operational, financial or reputation issues.
Moderate	Failure causes some customer dissatisfaction which may include discomfort or annoyance. Customer will notice performance issues and deterioration. The event may result in product or service delivery delay.
Minor	Due to the nature of this failure, the customer experiences only slight annoyance. Customer will probably notice slight deterioration of the process or system performance or a slight inconvenience with a subsequent process, i.e. minor rework.
